About Me I am a quality driven software engineer that rejoices on making people's life easier by building simple and elegant software. I am currently set in Lisbon, Portugal.

Skills

Programming languages and others
- Java
- SQL
- Typescript
- Agile development

Spoken languages
- *Portuguese* Native
- *Spanish* Native
- *English* (C2 level)
- *French* (C1 level)

Interests

Professional
Topics on software quality, TDD, software design and functional Languages. I keep up to date by attending software meetups (Lisbon JUG, the Virtual JUG and the Software Craftsmanship Community in Lisbon). I also pickup technical reads.

Personal
I like hiking and doing some photography at it. I also like to collect coins from different times and places.

Juan Valdivia
Software Engineer

Education

2011 -2015, ISCTE-University Intitute of Lisbon
BS in Computer Science and some MS in Computer Science classes

Experience

Jan 2019 - present, *Software Engineer,* Carlsberg Group
Cadi is a sales force application for several countries
- Built and launched Cadi to 7 different European markets with a small multi functional team
- Laid down and documented ground rules for development practices
- By adding extensive integration tests, improved the overall project delivery also reducing unresolved bugs by an average 50%
- Solutions design and development for several micro-services and integration with in-house built e-commerce solutions

Oct 2017 - Dec 2018, *Software Engineer,* STEF-IT
Worked building and maintaining customer management tool for French company specialized in cold chain transportation and logistic
- Upgraded libraries versions implying full rework on UI (GWT)
- Corrective maintenance on search engine and SOA platform.
- Taking under my responsibility new younger developers

Aug 2016 - Aug 2017, *Software Engineer,* TIMWE Group
Worked on middle-ware to enhance mobile carriers and content partners capabilities for mobile subscriptions and promotion services.
- Built back-office for mobile VAS[1] runtime and did custom integrations to different AAA[2] services.
- Successfully migrated over 750K users from 6 different countries to work in the new platform
- Highly involved with clients to gather and discuss business and technical requirements

Side Projects

2019, *Carlsberg Group,* 12h Hackathon
Top 3. Business analysis and showcase of a solution to handle an upcoming business threat. Built a POC in Javascript

2018, *STEF-IT,* 24h Hackathon
Awarded first place. Demo application in Javascript that tackled workplace safety education practices around STEF-IT trucks, lifts and warehouses

2018, *Novabase GTE (now Axians),* DevOps Learning
Investigated and fostered environment for DevOps culture. Interviewed success and shared cases within the company. Collected articles and books that helped us form this internal community.
